

RATING ACTION COMMENTARY

Fitch Affirms Uruguay at 'BBB'; Outlook Stable

Tue 04 Jun, 2024 - 1:12 PM ET

Fitch Ratings - New York - 04 Jun 2024: Fitch Ratings has affirmed Uruguay's Long-Term (LT) Foreign-Currency (FC) and Local-Currency Issuer Default Rating (IDR) at 'BBB'. The Rating Outlook is Stable.

A full list of rating actions is at the end of this rating action commentary.

KEY RATING DRIVERS

Credit Fundamentals: Uruguay's 'BBB' rating is supported by relatively high GDP per-capita, strong governance indicators, and robust external finances. The rating is constrained by muted medium-term economic growth prospects affected by competitiveness challenges, a public debt burden sensitive to exchange-rate movements, a long record of high inflation (albeit improving) and policy flexibility constrained by dollarization, indexation, and shallow financial depth.

Growth Rebound, Structural Challenges: We project GDP growth will rebound to 3.2% in 2024 from 0.4% in 2023, as the negative effects recede from last year's once-in-a-century drought, consumption diversion towards Argentina and a scheduled shutdown of the country's main oil refinery. The new pulp mill project which started operations in 2023 will also boost growth having its first full year of production at capacity. We anticipate growth will hover around 2.5% in 2025. Low investment levels continue to constrain potential growth.

Improving Inflation: Inflation declined to 3.7% in April 2024, the lowest level in almost nineteen years and marking the eleventh consecutive month within the Banco Central del Uruguay's (BCU) target range of 3%-6%. This follows the appreciation of the Uruguayan peso, falling import prices and a swift increase of the policy rate in 2022. The BCU's ability to maintain inflation within the target is a significant achievement, marking the first time in

over two decades that it has done so for an extended period. Inflation expectations have converged to the upper level of the target range but remain elevated reflecting historically high inflation levels.

Slightly Wider Fiscal Deficits: The central government posted a budget deficit of 3.3% of GDP in 2023 (excluding "cincuentones" pension transactions), above the original budget projection of 2.6% but broadly in line with a revised 3.2% projection incorporating the effects of the 2022-23 once-in-a-century drought. Fitch anticipates the fiscal balance will decline slightly to 3.2% in 2024 and remain in similar levels through 2025. Consolidation this year will hinge on the clearing of the 2023 one-off effects, such as the drought and price differential with Argentina. We do not expect the election cycle to be a source of spending pressure as has been the case in the past.

Fiscal Rule Compliance: The government invoked the exception clause in the borrowing limit of its fiscal rule (which includes a spending limit, net borrowing limit and a structural balance target) due to the impact of the drought and a mid-year revision to the structural balance target. Uruguay's fiscal rule has enhanced credibility and transparency by facilitating greater scrutiny and accountability around fiscal performance. The relaxation of fiscal goals has been marginal but may highlight a challenging environment for further fiscal consolidation. Fitch does not anticipate the next administration to materially deviate or remove the fiscal rule.

Gradual Upward Government Debt Trend: General government debt rose to 63.5% at end-2023 from 59.1% in 2022, above the 55% 'BBB' median. The debt increase was driven by a 2pp rise in loans and commercial bonds and 2pp in bonds issued to recapitalize the central bank. The BCU's equity fell into negative territory in 2022 and was below the legal minimum due to peso appreciation. Our deficit forecasts are consistent with broadly stable debt/GDP, but we expect a moderate rise in the debt ratio in the outer years of our forecast horizon reflecting muted economic medium-term growth.

Competitive Elections: The October 2024 general elections are shaping up to be competitive, according to current polls, amid an increase of grievances on income inequality, corruption, criminality and education attainment. Strong political and social stability in Uruguay suggests that a radical policy shift is unlikely, regardless of the outcome. The next administration will face the challenge of complying with the fiscal rule amid budgetary rigidities and pressure to address social demands. The opposition Frente Amplio coalition's decision not to endorse the social security referendum signals a basic political consensus around policy continuity.

Referendum Present a Tail Risk: The Labor Union, PIT-CNT, proposed a constitutional amendment to the social security system through a public referendum. The referendum will contain three modifications to the current system: a decrease in the retirement age from 65 to 60, aligning the minimum pension to the minimum wage, and the elimination of private individual savings.

The referendum is binding and, if successful, would incorporate the changes in the constitution. Fitch anticipates the population will reject the referendum as it has little political backing. Most politicians and presidential candidates have been vocal in their rejection of the proposal.

Current Account Deficit to Ease: Fitch forecast the current account deficit to decline to 0.7% of GDP in 2024 from 3.6%, owing to driven by UPM's first year at full production capacity, exports recovery from last year's drought and rising relative prices in Argentina. Uruguay's foreign exchange reserves remain relatively high, which, coupled with robust banking sector external liquidity, results in one of the highest Fitch-calculated international liquidity ratios among 'BBB'-rated countries.

ESG--Governance: Uruguay has an ESG Relevance Score (RS) of '5' [+] for both Political Stability and Rights, and for the Rule of Law, Institutional and Regulatory Quality and Control of Corruption. These scores reflect the high weight that the World Bank Governance Indicators (WBGI) have in our proprietary Sovereign Rating Model (SRM). Uruguay has a high WBGI ranking at 83rd percentile, reflecting its long track record of stable and peaceful political transitions, well established rights for participation in the political process, strong institutional capacity, effective rule of law and a low level of corruption.

RATING SENSITIVITIES

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

--Public Finances: A substantial rise in government debt/GDP, for example due to widening of the fiscal deficit;

--Macro: Significant weakening of economic growth prospects or developments that undermine policy predictability and macroeconomic stability, particularly should this weaken public finances.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

--Macro: A sustained reduction in inflation and anchoring of expectations around the target, and progress in de-dollarization and/or reducing indexation that improves policy flexibility;

--Public Finances: A sustained decline in government debt/GDP consistent with a low budget deficit;

--Macro: Improved economic growth and investment prospects; for example, via economic reforms that address competitive weaknesses.

SOVEREIGN RATING MODEL (SRM) AND QUALITATIVE OVERLAY (QO)

Fitch's proprietary SRM assigns Uruguay a score equivalent to a rating of 'BBB+' on the Long-Term Foreign Currency (LT FC) IDR scale.

Fitch's sovereign rating committee adjusted the output from the SRM to arrive at the final LT FC IDR by applying its qualitative overlay (QO), relative to SRM data and output, as follows:

Macro: -1 notch, to reflect macroeconomic policy flexibility is constrained by high dollarization, indexation and high inflation expectations. A poor record of compliance with inflation targets reflects institutional shortcomings not captured in the strong governance indicators that feed into the SRM, though the authorities are taking steps to improve this. Fitch projects medium-term growth prospects at a relatively modest 2%, partly reflecting low investment rates.

Fitch's SRM is the agency's proprietary multiple regression rating model that employs 18 variables based on three-year centered averages, including one year of forecasts, to produce a score equivalent to a LT FC IDR. Fitch's QO is a forward-looking qualitative framework designed to allow for adjustment to the SRM output to assign the final rating, reflecting factors within our criteria that are not fully quantifiable and/or not fully reflected in the SRM.

COUNTRY CEILING

The Country Ceiling for Uruguay is 'A-', 2 notches above the LT FC IDR. This reflects no material constraints and incentives, relative to the IDR, against capital or exchange controls being imposed that would prevent or significantly impede the private sector from converting local currency into foreign currency and transferring the proceeds to non-resident creditors to service debt payments.

Fitch's Country Ceiling Model produced a starting point uplift of +2 notches above the IDR. Fitch's rating committee did not apply a qualitative adjustment to the model result.

REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING

The principal sources of information used in the analysis are described in the Applicable Criteria.

ESG CONSIDERATIONS

Uruguay has an ESG Relevance Score of '5' [+] for Political Stability and Rights as WBGI have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and a key rating driver with a high weight. As Uruguay has a percentile rank above 50 for the respective Governance Indicator, this has a positive impact on the credit profile.

Uruguay has an ESG Relevance Score of '5' [+] for Rule of Law, Institutional & Regulatory Quality and Control of Corruption as WBGI have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and a key rating driver with a high weight. As Uruguay has a percentile rank above 50 for the respective Governance Indicators, this has a positive impact on the credit profile.

Uruguay has an ESG Relevance Score of '4' [+] for Human Rights and Political Freedoms as the Voice and Accountability pillar of the WBGI is relevant to the rating and a rating driver. As Uruguay has a percentile rank above 50 for the respective Governance Indicator, this has a positive impact on the credit profile.

Uruguay has an ESG Relevance Score of '4' [+] for Creditor Rights as willingness to service and repay debt is relevant to the rating and is a rating driver for Uruguay, as for all sovereigns. As Uruguay has record of 20 years without a restructuring of public debt, which is captured in our SRM variable, this has a positive impact on the credit profile.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers.

Please read these limitations and disclaimers by following this link:

<https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. ESMA and the FCA are required to publish historical default rates in a central repository in accordance with Articles 11(2) of Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 and The Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 respectively.

Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at

<https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent

sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Fitch also provides information on best-case rating upgrade scenarios and worst-case rating downgrade scenarios (defined as the 99th percentile of rating transitions, measured in each direction) for international credit ratings, based on historical performance. A simple average across asset classes presents best-case upgrades of 4 notches and worst-case downgrades of 8 notches at the 99th percentile. For more details on sector-specific best- and worst-case scenario credit ratings, please see [Best- and Worst-Case Measures](#) under the Rating Performance page on Fitch's website.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to

the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001. Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those

subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

dv01, a Fitch Solutions company, and an affiliate of Fitch Ratings, may from time to time serve as loan data agent on certain structured finance transactions rated by Fitch Ratings.

SOLICITATION STATUS

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

ENDORSEMENT POLICY

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's [Regulatory Affairs](#) page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
